Cebu, Philippines

Dear **MAM ANGTUD**:

Greetings from CAL Philippines, Inc.!

For more than twenty (20) years, CAL has been instrumental in equipping students of its partner educational institutions from both public and private with the 20th Century skills in ICT; and it takes pride in pioneering ICT education in the Philippines, through its advance and K-12 aligned ICT curricula, the core of CAL's ICT education integration program. In view of that, CAL will conduct the **CAL ICT Summit 2018**:

<b>THEME</b>	<b>Success Through Synergy</b>
<b>INTRODUCTION</b>	<p>Information and Communication Technology (ICT) plays a pivotal role in the economic development of any country in the age of 21st Century. With that, ICT industries have been growing exceptionally fast. In the Philippines, the Information Technology and Business Process Management (IT-BPM) sourcing sector continues to take the lead in transforming businesses by leveraging IT-enabled solutions to adapt to increasing demanding market. The Information Technology and Business Processing Association of the Philippines (IT-BPAP) reported an increase of more than 100,000 jobs annually since 2010-2016 in the IT-BPM sector and will continue to grow. The report added that in 2016, the revenue from Philippine IT-BPM generated P1.2 Trillion and is projected to grow to P2 Trillion in 2022.</p> <p>With this opportunity comes the biggest challenge also. How are we going to produce the numbers of workforce with the right skills that the industry needs? Thus, the burden in answering the challenge falls to the educational institutions, both public and private, in equipping learners with the in-demand and relevant skills. Government policies on education are improved to support various stakeholders to meet the goals. Other government agencies and local government units are active in providing assistance in terms of improving technology infrastructure, facilities for training, experts to guide, and venue for innovation incubation.</p>

	<p>Moreover, stakeholders from the business sector are upping their solutions by leading educational institutions in the integration of ICT in the entire learning experience of the students. Computer Assisted Learning (CAL) Philippines has been at the forefront of ICT education in the past twenty-years, by providing unique solution to its partner institutions with a well-researched, internationally and locally aligned ICT curriculum that is aimed to prepare students for work after secondary schools.</p>
<b>RATIONALE/ OBJECTIVES</b>	<p>As part of its advocacy, CAL will conduct series of ICT Summits throughout the country to bring together educators, school administrators, policy makers, and experts from the industry to discuss</p> <ul style="list-style-type: none"> <li>• trends in ICT education (DepEd);</li> <li>• roadmap for ICT education (DepEd);</li> <li>• trends in the job market (DOLE, NEDA));</li> <li>• certifications and qualifications of the graduates (TESDA);</li> <li>• challenges in the implementation of ICT integration (DepEd);</li> <li>• best practices in ICT education with international and local perspectives (Microsoft);</li> <li>• and innovations in ICT education (Robotics).</li> </ul> <p>In the past events, CAL gathered thousands of participants from public and private institutions and from different regions and demographics to benefit not only those in the accessible areas. Officials and representatives from the Department of Education, National Economic and Development Authority, Department of Science and Technology, Commission on Higher Education, Department of Information and Communications Technology provided insights regarding topics mentioned above knitted by the annual ICT Summit's theme.</p>
<b>DATE TIME VENUE</b>	<p>November 20, 2018   November 27, 2018 8:00am – 4:00PM TBA</p>
<b>TARGET AUDIENCE</b>	<p>Participants may include school administrators, principals, academic coordinator and IT teachers from private schools located under Cebu Province Division.</p> <p>Maximum of two (2) participants per school.</p>
